"The Construct" is an adventure indie game mixing up 50's design with a modern world of survival and great story. It's a classical top-down view adventure indie game. "The Construct" is a story in which you must find out who stole the agent's item, that you have to do so by freeing the other building blocks from the chains the thief implanted in them. Not by searching for the item, but by breaking the chains. It's a mysterious story, that will move you with the story of an agent. The agent is changing throughout the game. One of his main characteristics is his calmness, as he has to stay calm in his line of action. He is not angry, he doesn't cry and he is not gonna kill anyone, that's why the thief has to think of a different approach, and it's your task to find him and to destroy the chains while you will be trying to see who is the agent in each level and see that he is nothing else but agent. You have to find hidden items, switch levels and of course destroy the chains all around the blocks. "The Construct" features a unique, dynamic and varied level design with a contemporary and mysterious storyline. And to top it all off, the game features a challenging "Recovery" and "Hard" mode, that adds new features to the original gameplay and that makes it extremely hard to complete the game for the first time. Points of Interest A quite complicated story, that will make you think, wonder and try to find the main truth. A special storyline that challenges you and makes you think from beginning to the end. You will have to guide your agent, that is changing during the game, trough the levels. A new mechanic in the game: the blocks are controlled by "chains" that the thief is controlling them with, that are implanted in the blocks, the agent has to break them. A quite big and difficult puzzle mechanic that will make you sweat before unlocking the next level. The "Recovery" and "Hard" modes that offers several options to the base gameplay, such as new map designs, how fast the agent has to move and how many blocks he has to break at a time. Completely controller and keyboard support. Media "The Construct" main

What's new:

As a rare and limited run of Custom Armor and a collectible piece of armor. This is simply the best option for someone to have a custom and rare piece of armor. Fits almost any Mens or Womens body. The fit and look of this armor set is awesome. The armor set has the custom tiger painted on it. In front and on the back on the chest. The armor has various little things placed on there to add to the overall look of the armor. The armor also has a leather-like finish and texture to it. The armor has Facing on this armor set. The leather look is totally new and unique. The armor set is mostly white. The armor set comes with some Snaps or Clips for the arms of the armor set. This Armor set will be custom made from your measurements and at my cost. The Custom Tiger Armor set is one-of-a-kind and limited. If you want this armor set to be unique in concept, color and design, Custom Tiger Armor is your one-stop shop for custom uniform pieces. The pants, vest and head gear are all the same color. The armor has a few buttons that can be seen on both the front and the back. The rest of the armor has snaps on the sides of the armor to allow the armor to be worn or removed as desired. The set is good looking, but it is too big. I've taken pics to help you judge size. I am 5'10", and I consider this armor to be 'oversized.' I wouldn't recommend to a child. The set is hot not because of the material but because of the fit. I will recommend this to a small or average guy, but I would

not recommend it to a skinnier or bigger man. I feel the fabric is thick and will not be a good choice for someone that is trying to lose weight. This review is for a DYNASTY WARRIORS 9 customers of the armor set and possible customizations. What others think of this armor set or any of the customizations done by them is irrelevant to what others think of this armor set. The price of this armor is very high and I do not recommend paying that for a one of a kind piece of armor that maybe you will wear only once or twice in your life. I would do it differently if given the chance and for an even cheaper price. If you want to

Wunderkammer is a game about taking on the role of a time traveller and exploring a maze of time traveling madness in your journeys. Wunderkammer is a story about realizing the powers you never knew you had, experiencing the power of the time tunnel, and of course, it's all about the exploration. NOTE: What began as the Wunderkammer comic strip in 2013 has evolved into a full scale game in 2016. The game is free. By downloading this game, you will be given access to the main comic strip and all updates. What is Wunderkammer? The Wunderkammer is an Intergalactic time travel center where people can request or discover time travel and the rules of time travel through time bending experiments and activities. The Wunderkammer is run by Meel, the Keeper of Wunderkammer. The Keeper decides which missions to accept or decline from time travelers from all across the galaxy. You will be given a list of time traveling missions to complete. Go through Meel's portfolio and make the best choice to travel to your own time. NOTE: Completing a time mission is only the first step of many other storylines that develop from the mission. There are multiple missions and you can complete multiple missions through this one ticket. How do I complete a mission? Through use of a time travel device called a "Zuhause", you will be able to travel to the chosen destination in a single instant of time, and interact with the other characters of the mission. Start with

the task you need to complete at the place you need to be. Remember, the task is only the first part. The missions lead to tons of different things. You can choose to just do the task or complete everything else there is to do at that point. It's up to you. NOTE: The Wunderkammer is a living entity and it is always evolving. Because of this, not all missions are available all of the time. You'll have to work for it. How do I move through the Wunderkammer? The Wunderkammer is a 3D world. It's a maze of portals that you can travel through in any way you want. The routes the player takes are usually the fastest. But if you do want to, you can move through the portals using any items you posses.
